

[Sample Mjpeg Video File 23](#)

Unrivalled Video Quality

DeckLink lets you work with compressed video formats such as ProRes and DNxHD as well as 10-bit uncompressed video. When working with uncompressed video, all images are a mathematically perfect pixel-for-pixel clone of the source, without any generational loss, so you have the confidence you're working at the absolute highest quality possible.

Get sharper keying with green screens, cleaner compositions, superior color correction and more! Support for industry leading file formats ensures that you can maintain high quality throughout post production should you need to use video compression.
